For use with most two and four posts lifts. The Omega Wheel Arm is designed to clamp to the arm of the lift for easy storage of removed tires from the vehicle. The Omega Wheel arm not only helps eliminate trip hazards in the shop but also helps aid in the prevention of back injuries due to constant bending of technicians while placing the tire on the ground. This will help you place the tire at your core height with minimal twisting and turning.

About SFA Companies

SFA Companies is one of several Sales, Distribution, Marketing & Service branches of Shinn Fu Manufacturing Group focusing on the western hemisphere for these functions. Over the past 40 years SFA has established itself as one of the leading suppliers of hydraulics and shop equipment.

In addition to distribution, SFA has also played a key role in engineering, research and product design to help our manufacturing facilities meet our market needs. Our OEM private-label customers, with their strict requirements, are a vital part of this effort. March of 2008 SFA obtained ISO 9001:2000 Certification operation processes and policies.

Our products are manufactured in the Shinn Fu Group’s ISO-9000 factories so we are able to provide a quality product that meets the industry standards, such as ASME/ANSI. Also, Shinn Fu Group has been granted many US patents to feature our unique product designs, which enhances our innovation and quality. Due to the factories’ capabilities, we are able to give our customers products that are competitively priced, without sacrificing quality and design features.

Contact Us

Contact your local distributor for SFA branded products, accessories, or parts. To find a distributor near you, go to www.sfacompanies.com/TechZone/ServiceCenter. If you have a warranty question or are in need of tech support, call us at 1-816-891-6390 Monday-Friday from 8:00 A.M. to 4:45 P.M.

SAFETY MESSAGES

For Your Safety

NEVER use any equipment listed in this catalog without first completely reading, understanding and following instructions AND safety precautions noted in your products manual. The warnings and/or safety messages listed below are NOT a complete list of warning. We insist that you read your product’s owners manual thoroughly and keep your manual available for referencing throughout the life of your product.

Service Jacks and Jack Stands

Inspect before each use. Do not use if broken, bent, cracked, or damaged parts (including labels) are noted. Any jack that appears damaged in any way, operates abnormally or is missing parts, shall be removed from service immediately and the manufacturer notified. If you suspect that the jack was subjected to a shock load (a load dropped suddenly, unexpectedly upon it), immediately discontinue use until the jack has been checked by a factory authorized service center (contact distributor or manufacturer for list of Authorized Service Centers). It is recommended that an annual inspection be done by qualified personnel. Replace worn or damaged parts with Hein-Werner Authorized Replacement Parts only. Labels and owner’s manuals are available from manufacturer. WARNING: Never use this jack as a stand-alone device. After lifting, immediately support the lifted vehicle with a pair of appropriately rated vehicle stands.

WARNING: Do not lift or carry jack by handle. Handle could dislodge and jack fall, resulting in possible injury or property damage.

WARNING: Lift only on areas of the vehicle as specified by the vehicle manufacturer.

WARNING: Never work on, under or around a load supported only by a hydraulic jack.

WARNING: Overloading may cause hydraulic system failure and sudden loss of load.

WARNING: Clear all tools and personnel before lowering vehicle. The further release valve (handle) is turned counter-clockwise, the faster the load will descend. Maintain control of the speed at which the load lowers at all times.

Cylinders/Rams and Bottle Jacks

Do not exceed rated capacities

Use only on hard level surface capable of sustaining the load

Do not connect actuators to pumps with higher pressure ratings

Always inspect hoses and connections for damage prior to use

Keep hands and feet clear of work area

Immediately after lifting, support the load with appropriate means

Use only manufacturer approved hydraulic fluid (when applicable)

No alterations shall be made to these products

Failure to heed these markings may result in injury and/or property damage

Hydraulic Pumps

READ AND UNDERSTAND ALL WARNINGS, INSTRUCTIONS AND OWNER’S MANUAL INFORMATION BEFORE ATTEMPTING TO USE THIS EQUIPMENT

• Burst hazard exists if hose or connection pressure exceeds rated pressure. • Do not exceed the rated capacity of this device. Monitor pressure and load at all times. • Verify load with calibrated load cell and indicator, accurate pressure gauge or equivalent devices. • Inspect hoses and connections for damage prior to use. Never attempt to grasp a leaking pressurized hose. • Release the hydraulic pressure before disconnecting hoses or couplers, and before servicing the pump or accessory. • Immediately after lifting, support the load with appropriate means. Never rely on hydraulic pressure to support a load. • Wear protective clothing and eye protection that meets ANSI Z87.1 and OSHA standards when operating this equipment. • Ensure that the chosen application is stable to work on and around. • Do not subject the pump and its components to shock loads. • Do not connect to application which can return more oil to the reservoir than the pump reservoir can hold. • Ensure that the rated pressure of all applications and fittings be equal to or greater than the rated pressure of this pump. • Keep hydraulic equipment away from flames and heat. • No alterations shall be made to this device. • Failure to heed these warnings may result in personal injury as well as property damage.

SAFETY

Warnings may result in personal injury as well as property damage.

Equipment away from flames and heat. • No alterations shall be made to this device. • Failure to heed these warnings may result in personal injury as well as property damage.
